Support through sight loss

HOW DO I KNOW IF MY CHILD HAS A PROBLEM WITH THEIR EYES?

Some eye conditions do not display signs or symptoms when there is a problem, so the best way of keeping a check on your child's eye health is through regular eye tests with an optician.

Signs of potential problems with a child's sight

eye appearing to drift
inwards or outwards

difficulty concentrating

behavioural problems

headaches

sitting too close to the
television

rubbing their eyes a lot.
