

Mathematics in Year 5

The children are going to be directed to focus on methods of operation and mental calculation this term.

A suggestion for each week would be for the children to spend four sessions of around 5-10 minutes practicing them during a week. I have added suggested examples of what children might be expected to do. Worksheets are available on the school website and printed copies have been sent home and are available in class.

Year 5 Summer term timetable

Week	Week commencing	Focused methods
